AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method of reproducing a recording medium containing different types of contents recorded in random order, comprising the steps of:

(a) identifying all types of data written on the recording medium in ~~sections~~ sessions which are randomly arranged as to data type;

(b) arranging and listing ~~sections~~ sessions of said data by data type;

(c) presenting said listing in a menu screen for selecting at least one type among the identified types: and

(d) selectively reproducing one of (1) all ~~sections~~ sessions listed under the selected type and (2) one or more data ~~sections~~ sessions listed under the selected type through the presented menu screen.

2. (Original) The method of claim 1, wherein the data written on the recording medium is grouped by at least one session.

3. (Original) The method of claim 2, wherein each session contains same type of data.

4. (Original) The method of claim 2, wherein data type information is written on each lead in area placed at the head of each session.

5. (Currently amended) The method of claim 1, wherein the menu screen includes a choice button or box for selecting all data ~~sections~~ sessions of same type at a time.

6. (Currently amended) The method of claim 1, wherein information indicative of same type of data ~~sections~~ sessions is collectively placed in the menu screen.

7. (Original) The method of claim 1, wherein the data type represents data attribute indicative of audio, video, or text.

8. (Original) The method of claim 1, wherein the data type represents data compressing scheme.

9. (Currently Amended) A method of reproducing a recording medium containing different types of contents in a plurality of sessions which are randomly recorded as to type, comprising the steps of:

(a) identifying each type of the plurality of randomly recorded sessions sequentially;

(b) composing type telling information based on the identified types wherein information indicative of same type of data ~~sections~~ sessions is to be collectively listed when the type telling information is viewed;

(c) presenting the type telling information with a choice button or box for selecting a type; and

(d) selectively reproducing one of (1) all ~~sections~~ sessions listed under the selected type and (2) one or more data ~~sections~~ sessions corresponding to the selected type from a user.
